

BYPASS PRUNER PLUS VITPP220

The Plus pruning shear is designed to deliver clean and precise cuts on green and dry branches. Its carbon-steel blade offers long-lasting sharpness and durability, ensuring consistent performance over time. Ergonomic handles provide comfort and reduce fatigue during extended gardening sessions in yards, orchards and decorative plant maintenance. Its robust construction enhances stability and control, making it suitable for frequent use. The integrated safety lock allows secure storage and prevents accidental opening, ensuring safe and convenient handling.
