

STRAIGHT-BLADE HARVEST SHEARS 190MM

VITVD

These shears are designed for grape harvesting, crop harvesting and cutting small stems in agricultural, gardening and plant maintenance applications. The straight blade supports simple, controlled cuts and is suitable for repetitive tasks where precision and speed are important. Equipped with a carbon steel blade, they provide suitable durability for frequent use in seasonal or maintenance work. The cutting capacity of up to 8 mm makes them suitable for cutting light vegetation while maintaining practical operation during harvesting tasks. The safety lock allows the shears to be stored and transported with greater protection, reducing the risk of accidents. The low weight and compact design contribute to easy handling during continuous work.

Key features

- > Straight blade, supporting simple and controlled cuts;
- > Carbon steel for durability during frequent use;
- > Cutting capacity of up to 8 mm, suitable for light vegetation;
- > Safety lock, allowing the shears to be stored with greater protection;
- > Low weight that makes repetitive work easier;
- > Practical operation, suitable for grape harvesting, crop harvesting and agricultural maintenance.

Specifications

Blade	Carbon steel
Security locking system	Yes
Dimensions	50 x 30 x 190 mm
Weight	0,14 kg
