

SELF RETRACTING UTILITY KNIFE WITH SK5 BLADES

VIX18AA

Developed for cutting tasks that require greater safety during handling, this cutter features an auto-retracting mechanism that returns the blade to the closed position as soon as the button is released. It also includes an automatic locking system that keeps the blade fixed in the desired open position when this mode is activated. The tool includes three SK5 steel blades and combines a high-impact ABS handle with a TPR-coated metal construction. This configuration provides a firm grip and makes the cutter suitable for different cutting tasks, opening cardboard boxes and maintenance.

Key features

> **Auto-retracting mechanism, retracting the blade when the button is released;**
> **Automatic locking system that keeps the blade fixed in the selected position;**
> **Three SK5 steel blades for greater continuity during cutting tasks;**
> **High-impact ABS handle, reinforcing robustness during handling;**
> **Firm grip ensured by the TPR-coated metal construction.**
