

## SET OF 3 PLIERS

### VICM3A

The bi-material handle provides greater sensitivity and robustness when opening and closing, as well as greater leverage that reduces effort and increases strength. The ergonomics of the state-of-the-art handles provide less fatigue during longer periods of use. With a slight, almost imperceptible depression to increase the traction point when necessary. The opening at the end allows you to use a fixing system for work at height. Made from chrome vanadium steel, this set offers exceptional durability and a consistent performance in any working situation.
